

THE HORSE'S VOICE SADDLING

a System for Happy Horses

If the saddle is padded correctly, pressing down on the pommel then cantle, there should be NO rock

Lowest point should be the center of the seat

Without a pad, the saddle ...

... should be too wide and tip down in front

Gullet too wide (touching the wither)

Pay attention to

Gullet too narrow

Promotes optimum wellness & helps with:

Poor muscles

Generally poor posture

Sway back

Roach back

Common pad combinations (on top of a Wool Fleece blanket) to cushion & balance the saddle

Pro Complete Base Pad 1/4' or 1/2' with a 1/4' JB build in

Pro Complete Base Pad and JB Pad 1/4' or 1/2'

Pro Complete Base Pad and RemB Pad 1/4' or 1/2'

Padding appropriately = the saddle works optimally every ride & promotes improvement / maintenance of good posture and muscling.

Pro Complete Large JB Pad 1/4'

Pro Complete Large JB Pad 1/4' and JB Pad 1/4' or 1/2'

Pro Complete JB Pad 1/4' or 1/2'

THV consultants / advisors are here to help if you're ever unsure.

Special Situations

Heavier riders

Beginners

always use a Pro Complete Base Pad

Jumping - standing in the stirrups

Add an Extra 1/4' JB Pad

On trail rides Use a Pro Complete Base Pad
